HL7 FHIR R4 — Chapter & 01: Home + Indexes (sections 0 – 1.10.4)

Source: HL7 FHIR R4 (v4.0.1) specification, https://hl7.org/fhir/R4/ — text-only rendition for AI ingestion; page order follows toc.html.

0 Welcome to FHIR®

URL: https://hl7.org/fhir/R4/index.html

FHIR is a standard for health care data exchange, published by HL7®.

First time here? See the executive summary, the developer's introduction, clinical introduction, or architect's introduction, and then the FHIR overview / roadmap & Timelines. See also the open license (and don't miss the full Table of Contents and the Community Credits or you can search this specification).

Technical Corrections:

• 4.0.1, Oct-30 2019: Corrections to invariants & generated conformance resources, and add ANSI Normative Status Notes

Level 1 Basic framework on which the specification is built

Foundation

Base Documentation, XML, JSON, Data Types, Extensions

Level 2 Supporting implementation and binding to external specifications

Implementer Support

Downloads, Version Mgmt, Use Cases, Testing

Security & Privacy

Security, Consent, Provenance, AuditEvent

Conformance

StructureDefinition, CapabilityStatement, ImplementationGuide, Profiling

Terminology

CodeSystem, ValueSet, ConceptMap, Terminology Svc

Exchange

REST API + Search Documents Messaging Services Databases

Level 3 Linking to real world concepts in the healthcare system

Administration

Patient, Practitioner, CareTeam, Device, Organization, Location, Healthcare Service

Level 4 Record-keeping and Data Exchange for the healthcare process

Clinical

Allergy, Problem, Procedure, CarePlan/Goal, ServiceRequest, Family History, RiskAssessment, etc.

Diagnostics

Observation, Report, Specimen, ImagingStudy, Genomics, Specimen, ImagingStudy, etc.

Medications

Medication, Request, Dispense, Administration, Statement, Immunization, etc.

Workflow

Introduction + Task, Appointment, Schedule, Referral, PlanDefinition, etc

Financial

Claim, Account, Invoice, ChargeItem, Coverage + Eligibility Request & Response, ExplanationOfBenefit, etc.

Level 5 Providing the ability to reason about the healthcare process

Clinical Reasoning

Library, PlanDefinition & GuidanceResponse, Measure/MeasureReport, etc.

Implementation Guides Specifications based on the FHIR standard Published by HL7, Affiliates & FHIR Foundation Other IGs (FHIR Confluence) | FHIR Foundation Enabling health interoperability through FHIR Community Forum + FHIR Chat Public Test Servers & Software Blogs that cover FHIR FHIR Confluence | Translations Note that translations are not always up to date Russian Chinese Japanese

Note: This specification requires a browser that is SVG compatible (Microsoft Internet Explorer 10+/Edge, Firefox 3.0+, Chrome, or Safari), and uses the browser's session storage to remember which tabs are active.

1.1 Table Of Contents

URL: https://hl7.org/fhir/R4/toc.html

1.0 Full Table of Contents

FHIR Infrastructure Work Group | Maturity Level: N/A | Standards Status: Informative

During ballot, this Table of Contents shows, for each page, which ballot it is part of. Legend:

- : Normative infrastructure ballot
- : Not normative (trial use, informative external)

Table of Contents

0 Welcome to FHIR® (Trial Use)
1.1 Table Of Contents (Trial Use)
1.2 Resource Index (Trial Use)
1.3 Profiles defined as part of FHIR (Trial Use)
1.4 FHIR Core-defined Extension Registry (Trial Use)
1.5 Defined RESTful API Operations (Trial Use)
1.7 Namespaces defined by FHIR (Trial Use)
1.8 FHIR Workgroup List Report (Trial Use)
1.9 Getting Started with FHIR (Trial Use)
1.10 HL7, ANSI and the FHIR Standard (Trial Use)
1.10.1 FHIR Infrastructure Package (Trial Use)
1.10.2 FHIR Conformance Package (Trial Use)
1.10.3 FHIR Patient Package (Trial Use)
1.10.4 FHIR Observation Package (Trial Use)
2 Foundation Module (Trial Use)
2.1 Conformance (Normative / Infrastructure)
2.1.1 Best Practices (Trial Use)
2.2 FHIR Life Cycle Page (Trial Use)
2.3 Resource References (Normative / Infrastructure)
2.4 Narrative (Normative / Infrastructure)
2.4.1 Example Narrative (Trial Use)
2.5 Extensibility (Normative / Infrastructure)
2.5.1 Defining Extensions (Normative / Infrastructure)
2.5.2 Examples (Trial Use)
2.5.3 Extension - Detailed Descriptions (Normative / Infrastructure)
2.6 Resource Formats (Normative / Infrastructure)
2.6.1 XML Representation of Resources (Normative / Infrastructure)
2.6.2 JSON Representation of Resources (Normative / Infrastructure)
2.6.3 ND-JSON Representation of Resources (Trial Use)
2.6.4 Resource Description Framework (RDF) Representation (Trial Use)
2.7 Version Management Policy (Normative / Infrastructure)
2.8 Managing Multiple FHIR Versions (Trial Use)
2.9 FHIRPath (Trial Use)
2.10 Version History since DSTU #1 (Trial Use)
2.11 Differences from Release 3 (Trial Use)
2.12 Transforms between DSTU 3 and STU 4 (Trial Use)

Additional Resources will be added in the future. A list of hypothesized resources can be found on the HL7 Confluence . Feel free to add any you think are missing or engage with one of the HL7 Work Groups to submit a proposal to define a resource of particular interest.

1.3 Profiles defined as part of FHIR

URL: https://hl7.org/fhir/R4/profilelist.html

1.3 Profiles defined as part of FHIR

FHIR Infrastructure Work Group | Maturity Level: N/A | Standards Status: Informative

This specification is a common platform standard that must be adapted to particular use cases. Some particular use cases are common or important enough to be described as a part of the specification itself. These are published as groups of Structure Definitions (profiles or extensions), which are often found in implementation guides, along with Value Sets, newly defined search parameters and examples that are all defined with a common purpose. Additional profiles and extensions may be registered on the HL7 FHIR registry at http://registry.fhir.org

Name | Description | Kind | FMM

General

EHRS FM Record Lifecycle Event - Audit Event | Defines the elements to be supported within the AuditEvent resource in order to conform with the Electronic Health Record System Functional Model Record Lifecycle Event standard | profiles

Clinical Reasoning Extensions | Defines common extensions used by the Clinical Reasoning Module. | extensions

Common extensions for Coding data type | Defines "common" extensions for use with the DataElement data type | extensions

Common extensions for ContactPoint data type | Defines "common" extensions for use with the ContactPoint data type | extensions

Element-definition Extensions for use by FHIR Implementers | A set of extensions that constrain data elements, whether used in DataElements, StructureDefinitions or Questionnaires | extensions

ISO 11179 Element Definition Profile | A profile showing how to use ElementDefinition to express 11179 Data_Element and Concept_Elements. At present, the profile is a partially-complete place-holder | extensions

DataElement constraint on ElementDefinition data type | Identifies how the ElementDefinition data type is used when it appears within a data element | profiles

Common extensions for ElementDefinition data type | Defines "common" extensions for use with the DataElement data type | extensions

Event Pattern HL7 Extensions | This profile defines extensions that can be used to provide alignment with the Event workflow pattern data elements for concepts that may be generally applicable but may be sufficiently uncommon that they are more appropriate to include as extensions than as core properties of the resource. See the workflow module for more discussion about this specification that are typically involved in workflow. | extensions

General Extensions for use by FHIR Implementers | A set of general extensions defined for the convenience of implementers that use FHIR resources | extensions

Common extensions for HumanName data type | Defines "common" extensions for use with the HumanName data type | extensions

Common extensions for Identifier data type | Defines "common" extensions for use with the Identifier data type | extensions

ISO 21090 Data Type Extensions | Extra ISO 21090 features not included in data types because of core design policy | extensions

International Realm Pharmacy Extensions Profile | Contains a number of pharmacy domain extensions relevant to a number of medication-related resources.

EHRS FM Record Lifecycle Event - Provenance | Defines the elements to be supported within the Provenance resource in order to conform with the Electronic Health Record System Functional Model Record Lifecycle Event standard | profiles

Common extensions for Quantity data type | Defines "common" extensions for use with the DataElement data type | extensions

Extensions for rendering data elements | A set of extensions dealing with controlling how particular data elements are rendered when displayed. Initially created for questionnaires, but potentially useable elsewhere. | extensions

Request Pattern HL7 Extensions | This profile defines extensions that can be used to provide alignment with the Event workflow pattern data elements for concepts that may be generally applicable but may be sufficiently uncommon that they are more appropriate to include as extensions than as core properties of the resource. See the workflow module for more discussion about this specification that are typically involved in workflow. | extensions

Smart App Launch Capability Statements | Formal definitions of Smart App Launch extensions in the CapabilityStatement | extensions

Common extensions for Timing data type | Defines "common" extensions for use with the Timing data type | extensions

Metadata HL7 Extensions | Defines common extensions used with or related to conformance and knowledge resources | extensions

Workflow Pattern HL7 Extensions | This profile defines extensions that can be used to provide alignment with the Event and Request workflow pattern data elements for concepts that may be generally applicable but may be sufficiently uncommon that they are more appropriate to include as extensions than as core properties of the resource. See the workflow module for more discussion about this specification that are typically involved in workflow. | extensions

ActivityDefinition

Shareable ActivityDefinition | Enforces the minimum information set for the activity definition metadata required by HL7 and other organizations that share and publish activity definitions | profiles

AllergyIntolerance

openEHR Archetype Profile | A set of extensions that define how the parts of the openEHR RiskOfAdverseReaction archetype that are not generaly encountered by implementers are represented | extensions

AllergyIntolerance HL7 Extensions | Defines common extensions used with or related to the AllergyIntolerance resource | extensions

AuditEvent

AuditEvent HL7 Extensions | Defines common extensions used with or related to the AuditEvent resource | extensions

Bundle

Common extensions for bundle-related types | Defines "common" extensions for use with the Bundle resource and contained elements | extensions

CapabilityStatement

Common CapabilityStatement extensions | Common extensions for use with the CapabilityStatement resource | extensions

CarePlan

Common Care Plan Extensions | A set of commonly used extensions that don't make the usage requirements for inclusion in the resource itself | extensions

CodeSystem

CodeSystem HL7 Extensions | Defines common extensions used with or related to the CodeSystem resource | extensions, search parameters

Shareable CodeSystem | Enforces the minimum information set for the value set metadata required by HL7 and other organizations that share and publish value sets | profiles

Communication

Communication HL7 Extensions | Defines common extensions used with or related to the Communication resource | extensions

CommunicationRequest

CommunicationRequest HL7 Extensions | Defines common extensions used with or related to the CommunicationRequest resource | extensions

Composition

Clinical Document | The Clinical Document profile constrains Composition to specify a clinical document (matching CDA). The base Composition is a general resource for compositions or documents about any kind of subject that might be encountered in healthcare including such things as guidelines, medicines, etc. A clinical document is focused on documents related to the provision of care process, where the subject is a patient, a group of patients, or a closely related concept. A clinical document has additional requirements around confidentiality that do not apply in the same way to other kinds of documents. | profiles, extensions

Profile for Catalog | describes how the Composition resource is used to represent a Catalog | profiles, extensions

Composition HL7 Extensions | Defines common extensions used with or related to the Composition resource | extensions

ConceptMap

ConceptMap HL7 Extensions | Defines common extensions used with or related to the ConceptMap resource | extensions

Condition

Condition HL7 Extensions | Defines common extensions used with or related to the Condition resource | extensions

Consent

Consent HL7 Extensions | Defines common extensions used with or related to the Consent resource | extensions

Device

Device HL7 Extensions | Defines common extensions used with or related to the Device resource | extensions, search parameters

DeviceRequest
DeviceRequest HL7 Extensions | Defines common extensions used with or related to the DeviceRequest resource | extensions
DeviceUseStatement
DeviceUseStatement HL7 Extensions | Defines common extensions used with or related to the DeviceUseStatement resource
DiagnosticReport
Example Lipid Profile | Describes how the lab report is used for a standard Lipid Profile - Cholesterol, Triglyceride and Cholesterol fractions. Uses LOINC codes | profiles | 1
DiagnosticReport HL7 Extensions | Defines common extensions used with or related to the DiagnosticReport resource | extensions
DiagnosticReport-Genetics | Describes how the DiagnosticReport resource is used to report structured genetic test results | profiles, extensions, search parameters
Profile for HLA Genotyping Results | Describes how the HLA genotyping results | profiles, extensions
Encounter
Encounter HL7 Extensions | Defines common extensions used with or related to the Encounter resource | extensions
Evidence
Evidence Synthesis Profile | Explanation of what this profile contains/is for. | profiles
EvidenceVariable
PICO Element Profile | Explanation of what this profile contains/is for. | profiles
FamilyMemberHistory
Family member history for genetics analysis | Adds additional information to a family member history supporting both the capture of mother/father relationships as well as additional observations necessary to enable genetics-based risk analysis for patients | profiles, extensions
Family Member History HL7 Extensions | Defines common extensions used with or related to the FamilyMemberHistory resource | extensions
Flag
Flag HL7 Extensions | Defines common extensions used with or related to the Flag resource | extensions
Goal
FHIR Core Goal Profile | This profile holds core Goal extensions | extensions
Group
Group Definition | Enforces a descriptive group that can be used in definitional resources | profiles
Actual Group | Enforces an actual group, rather than a definitional group | profiles
GuidanceResponse
CDS Hooks GuidanceResponse | Defines a GuidanceResponse that represents the response container for a CDS Hooks response | profiles
Immunization
Immunization HL7 Extensions | Defines common extensions used with or related to the Immunization resource
ImmunizationRecommendation
ImmunizationRecommendation HL7 Extensions | Defines common extensions used with or related to the ImmunizationRecommendation resource
ImplementationGuide
FHIR Core ImplementationGuide Profile | This profile holds core ImplementationGuide extensions
Library
Shareable Library | Enforces the minimum information set for the library metadata required by HL7 and other organizations that share and publish libraries | profiles
CQL Library | Represents a CQL logic library | profiles
List
List HL7 Extensions | Defines common extensions used with or related to the List resource | extensions
Location
Location HL7 Extensions | Defines common extensions used with or related to the Location resource | extensions
Measure
Shareable Measure | Enforces the minimum information set for the measure metadata required by HL7 and other organizations that share and publish measures | profiles
Medication
Medication HL7 Extensions | Defines common extensions used with or related to the Medication resource
MedicationAdministration
MedicationAdministration HL7 Extensions | Defines common extensions used with or related to the MedicationAdministration resource
MedicationDispense
MedicationDispense HL7 Extensions | Defines common extensions used with or related to the MedicationDispense resource
MedicationRequest
MedicationRequest HL7 Extensions | Defines common extensions used with or related to the MedicationRequest resource
MedicationStatement
MedicationStatement HL7 Extensions | Defines common extensions used with or related to the MedicationStatement resource
MessageHeader
Common extensions for message header | Defines "common" extensions for use with the messageheader resource and contained elements | extensions
NutritionOrder
NutritionOrder HL7 Extensions | Defines common extensions used with or related to the NutritionOrder resource | extensions
Observation
Device Metric Observation Profile | This profile describes the direct or derived, qualitative or quantitative physiological measurement, setting, or calculation data produced by a medical device or a device component. | profiles
Observation HL7 Extensions | Defines common extensions used with or related to the Observation resource | extensions
Observation-genetics | Describes how the observation resource is used to report structured genetic test results | profiles, extensions, search parameters

observation-vitalsigns | Defines constraints and extensions on the Observation resource for use in querying and retrieving Vital Signs information. | profiles
observation-bodyweight | Defines constraints and extensions on the Observation resource for use in querying and retrieving the vital sign body weight. | profiles
observation-vitalspanel | Defines constraints and extensions on the Observation resource for use in querying and retrieving the vital signs panel. | profiles
observation-bodyheight | Defines constraints and extensions on the Observation resource for use in querying and retrieving the vital sign body height. | profiles
observation-resprate | Defines constraints and extensions on the Observation resource for use in querying and retrieving the vital sign respiratory rate. | profiles
observation-heartrate | Defines constraints and extensions on the Observation resource for use in querying and retrieving the vital sign heart rate. | profiles
observation-bodytemp | Defines constraints and extensions on the Observation resource for use in querying and retrieving the vital sign body temperature. | profiles
observation-headcircum | Defines constraints and extensions on the Observation resource for use in querying and retrieving the vital sign head circumference. | profiles
observation-oxygensat | Defines constraints and extensions on the Observation resource for use in querying and retrieving the vital sign oxygen saturation. | profiles
observation-bmi | Defines constraints and extensions on the Observation resource for use in querying and retrieving the vital sign body mass index. | profiles
observation-bp | Defines constraints and extensions on the Observation resource for use in querying and retrieving the vital sign blood pressure. | profiles
OperationDefinition
Standard Operation Definition Extensions | This profile describes common extensions that are used with Operation Definitions | extensions
OperationOutcome
Standard OperationOutcome Extensions | This profile describes common extensions that are used with OperationOutcomes | extensions
Organization
Organization HL7 Extensions | Defines common extensions used with or related to the Organization resource | extensions
OrganizationAffiliation
OrganizationAffiliation HL7 Extensions | Defines common extensions used with or related to the OrganizationAffiliation resource | extensions
Patient
Patient HL7 Extensions | Defines common extensions used with or related to the Patient resource | extensions, search parameters
PlanDefinition
Shareable PlanDefinition | Enforces the minimum information set for the plan definition metadata required by HL7 and other organizations that share and publish plan definitions | profiles
Computable PlanDefinition | Defines a computable PlanDefinition that specifies a single library and requires all expressions referenced from the PlanDefinition to be definitions in that single library | profiles
CDS Hooks Service PlanDefinition | Defines a PlanDefinition that implements the behavior for a CDS Hooks service | profiles
Practitioner
Practitioner HL7 Extensions | Defines common extensions used with or related to the Practitioner resource | extensions
PractitionerRole
PractitionerRole HL7 Extensions | Defines common extensions used with or related to the PractitionerRole resource | extensions
Procedure
Procedure HL7 Extensions | Defines common extensions used with or related to the Procedure resource | extensions
Provenance
Provenance Relevant History | Guidance on using Provenance for related history elements | profiles
Questionnaire
Core extensions for Questionnaire | Contains standard extensions for Questionnaire, amongst others for validation | extensions
CQF-Questionnaire | Adds the ability to define behavior as part of a questionnaire. | profiles
QuestionnaireResponse
Core extensions for QuestionnaireResponse | Contains standard extensions for QuestionnaireResponse, amongst others for validation | extensions, search parameters
RequestGroup
CDS Hooks RequestGroup | Defines a RequestGroup that can represent a CDS Hooks response | profiles
SearchParameter
Standard Search Parameter Extensions | This profile describes common extensions that are used with Search Parameters
ServiceRequest
ServiceRequest-Genetics | Describes how the ServiceRequest resource is used to for genetics | profiles, extensions
Service Request HL7 Extensions | Defines common extensions used with or related to the Service Request resource | extensions
Specimen
Specimen HL7 Extensions | Defines common extensions used with or related to the Specimen resource | extensions
StructureDefinition
Standard Structure Definition Extensions | This profile describes common extensions that are used with Structure Definitions | extensions
Task
Task HL7 Extensions | Defines common extensions used with or related to the Task resource | extensions
ValueSet
ValueSet HL7 Extensions | Defines common extensions used with or related to the ValueSet resource | extensions, search parameters
Shareable ValueSet | Enforces the minimum information set for the value set metadata required by HL7 and other organizations that share and publish value sets | profiles

1.4 FHIR Core-defined Extension Registry

URL: https://hl7.org/fhir/R4/extensibility-registry.html

1.4 FHIR Core-defined Extension Registry

FHIR Infrastructure Work Group | Maturity Level: N/A | Standards Status: Informative

All extensions in this list are defined in this specification and have a base URI of http://hl7.org/fhir/StructureDefinition/. Additional extensions can be registered on the HL7 FHIR registry at http://hl7.org/fhir/registry .

1.5 Defined RESTful API Operations

URL: https://hl7.org/fhir/R4/operationslist.html

1.5 Defined RESTful API Operations

FHIR Infrastructure Work Group | Maturity Level: N/A | Standards Status: Informative

The RESTful API defines a set of common interactions (read, update, search, etc.) performed on a repository of typed resources. For further information concerning how operations are defined and invoked, see Extended Operations on the RESTful API.

This is a full list of the operations defined by this specification:

Base Operations (All resource types)
Validate a resource | [base]/[Resource]/$validate | [base]/[Resource]/[id]/$validate
Access a list of profiles, tags, and security labels | [base]/$meta | [base]/[Resource]/$meta | [base]/[Resource]/[id]/$meta

Add profiles, tags, and security labels to a resource | [base]/[Resource]/[id]/$meta-add
Delete profiles, tags, and security labels for a resource | [base]/[Resource]/[id]/$meta-delete
Convert from one form to another | [base]/$convert
Execute a graphql statement | [base]/$graphql | [base]/[Resource]/[id]/$graphql
Return a graph of resources | [base]/[Resource]/[id]/$graph
Operations Defined by Resource Types
Apply | [base]/ActivityDefinition/$apply | [base]/ActivityDefinition/[id]/$apply
Data Requirements | [base]/ActivityDefinition/[id]/$data-requirements
Fetch a subset of the CapabilityStatement resource | [base]/CapabilityStatement/$subset | [base]/CapabilityStatement/[id]/$subset
Test if a server implements a client's required operations | [base]/CapabilityStatement/$implements | [base]/CapabilityStatement/[id]/$implements
Test if a server implements a client's required operations | [base]/CapabilityStatement/$conforms
Discover what versions a server supports | [base]/$versions
Apply | [base]/ChargeItemDefinition/[id]/$apply
Submit a Claim resource for adjudication | [base]/Claim/$submit
Concept Look Up & Decomposition | [base]/CodeSystem/$lookup
Code System based Validation | [base]/CodeSystem/$validate-code | [base]/CodeSystem/[id]/$validate-code
Subsumption Testing | [base]/CodeSystem/$subsumes | [base]/CodeSystem/[id]/$subsumes
Finding codes based on supplied properties | [base]/CodeSystem/$find-matches | [base]/CodeSystem/[id]/$find-matches
Generate a Document | [base]/Composition/$document | [base]/Composition/[id]/$document
Concept Translation | [base]/ConceptMap/$translate | [base]/ConceptMap/[id]/$translate
Closure Table Maintenance | [base]/$closure
Submit an EligibilityRequest resource for assessment | [base]/CoverageEligibilityRequest/$submit
Fetch Encounter Record | [base]/Encounter/[id]/$everything
Fetch a group of Patient Records | [base]/Group/[id]/$everything
Data Requirements | [base]/$data-requirements | [base]/Library/[id]/$data-requirements
Find a functional list | [base]/List/$find
Evaluate Measure | [base]/Measure/$evaluate-measure | [base]/Measure/[id]/$evaluate-measure
Data Requirements | [base]/Measure/[id]/$data-requirements
Submit Data | [base]/Measure/$submit-data | [base]/Measure/[id]/$submit-data
Collect Data | [base]/Measure/$collect-data | [base]/Measure/[id]/$collect-data
Care Gaps | [base]/Measure/$care-gaps
Fetch Product Record | [base]/MedicinalProduct/$everything | [base]/MedicinalProduct/[id]/$everything
Process Message | [base]/$process-message
Fetch Preferred it | [base]/NamingSystem/$preferred-id
Observation Statistics | [base]/Observation/$stats
Last N Observations Query | [base]/Observation/$lastn
Find patient matches using MPI based logic | [base]/Patient/$match
Fetch Patient Record | [base]/Patient/$everything | [base]/Patient/[id]/$everything
Apply | [base]/PlanDefinition/$apply | [base]/PlanDefinition/[id]/$apply
Data Requirements | [base]/PlanDefinition/[id]/$data-requirements
Build Questionnaire | [base]/StructureDefinition/$questionnaire | [base]/StructureDefinition/[id]/$questionnaire
Generate Snapshot | [base]/StructureDefinition/$snapshot | [base]/StructureDefinition/[id]/$snapshot
Model Instance Transformation | [base]/StructureMap/$transform | [base]/StructureMap/[id]/$transform
Value Set Expansion | [base]/ValueSet/$expand | [base]/ValueSet/[id]/$expand
Value Set based Validation | [base]/ValueSet/$validate-code | [base]/ValueSet/[id]/$validate-code

Notes:

• The special operations on the meta element also operate on previous versions of a resource (/_history/). They are the only operations that can manipulate versions other than the "current" version.

• Implementation Guides can define additional operations

1.5.1 Services Defined by the FHIR specification

This specification defines a set of services, which are business level aggregations of Resources and Operations that provide a defined package of functionality that correspond to an identified business need.

Note that in addition to the services defined in this specification, many implementation guides define business level services.

This table lists the services currently defined:

Name | Description | Links
Terminology Service | A service that lets healthcare applications make use of codes, code systems, and value sets without having to become experts in the fine details of the code system, value set and concept map resources, and the underlying code systems and terminological principles. The service provides the following functionality: Defining and managing code systems, value sets, and concept maps Code lookup & Validation Value Set Expansion (including for UI data entry support) Value Set Validation Translations between code systems Subsumption testing and other logical analyses Maintaining a closure table | Capability statement module
Conformance Service | A service that provides the underlying services needed to test whether resources conform to the rules defined by the FHIR specification and applicable implementation guides, and to help author implementation guides. The service provides the following functionality: Defining and managing structure definitions, data elements, Capability statements, search parameters, and operation & compartment definitions Resource Validation Comparing and subsetting Capability statements | To be developed

Knowledge Repository | A service that provides basic retrieval and maintenance functionality for clinical knowledge artifacts. The service provides the following functionality: Defining and managing plan and activity definitions (e.g. order sets, protocols, decision support rules, documentation templates, etc.), libraries, and measures Search and retrieval of knowledge artifacts Data requirements analysis of knowledge artifacts | Capability statement module

Measure Processor | A service that provides measure evaluation functionality. The service provides the following functionality: Searching and retrieval of measure definitions Evaluation of measures for patients and populations Data requirements analysis of measure definitions | Capability statement module

Possible candidate Business Services for future versions:

- Conversion Service (using mapping language, and also iso-semantic transforms in a resource)
- Questionnaire related functionality (though see SDC)
- Patient Registration & Reconciliation service (per IXS)
- Medication Management service (home specific variant?)
- Clinical Data Repository
- Clinical Task Manager
- Communications Manager
- ...?

Note that there is already past & current work on some of these in HL7 (though not necessarily FHIR specific).

1.7 Namespaces defined by FHIR

1.9 Getting Started with FHIR

URL: https://hl7.org/fhir/R4/modules.html

1.9 Getting Started with FHIR

FHIR Infrastructure Work Group | Maturity Level: N/A | Standards Status: Informative

FHIR is a platform specification that defines a set of capabilities use across the healthcare process, in all jurisdictions, and in lots of different contexts. While the basics of the FHIR specification are relatively straight-forward (see the Overviews: General, Developers, Clinical, and Architects), it can still be difficult to know where to start when implementing a solution based on FHIR.

This page provides some guidance to help get new implementers started on their path to successful implementation. Beyond reading the overviews (previous paragraph), where should an implementer start? Generally, an implementer needs to resolve:

• How will information be exchanged? (see Foundation Module)
• How are terminologies being used? (see Terminology Module)
• How will the information be secured? (see Security and Privacy Module)
• When is information exchanged? (See Workflow Module)
• What information is going to be exchanged?

The remaining sections provide guidance on specific areas (Foundation, Implementer Support, Security and Privacy, Conformance, Terminology, Linked Data, Administration, Clinical, Diagnostics, Medications, Workflow, Financial and Clinical Reasoning).

All implementers should be aware of how versioning works in the FHIR specification. See both:

• Managing Multiple FHIR Versions
• Specification Version Management Policy

1.9.1 Modules

In order to help implementers find their way around the specification and answer these questions, it is organized into a set of "modules". Each module represents a different functional area of the specification, and contains:

• Scope and Index: A description of the content covered by the module, and an index of the important content
• Use cases: Guidance for common uses of the module, and how to approach them. This is a key resource for implementers familiarizing themselves with the FHIR specification
• Security / Privacy: Information
• Roadmap: Where the content covered by the module is in terms of overall progress (see also, for general information: FHIR Timelines)

Broadly, the modules are organized into 3 groups:

• Infrastructure (bottom rung, and bottom row of boxes)
• Content (middle rung, and top row of boxes)
• Reasoning (top rung)

Level 1 Basic framework on which the specification is built

Foundation

Base Documentation, XML, JSON, Data Types, Extensions

Level 2 Supporting implementation and binding to external specifications

Implementer Support

Downloads, Version Mgmt, Use Cases, Testing

Security & Privacy

Security, Consent, Provenance, AuditEvent

Conformance

StructureDefinition, CapabilityStatement, ImplementationGuide, Profiling

Terminology

CodeSystem, ValueSet, ConceptMap, Terminology Svc

Exchange

REST API + Search Documents Messaging Services Databases

Level 3 Linking to real world concepts in the healthcare system

Administration

Patient, Practitioner, CareTeam, Device, Organization, Location, Healthcare Service

Level 4 Record-keeping and Data Exchange for the healthcare process

Clinical

Allergy, Problem, Procedure, CarePlan/Goal, ServiceRequest, Family History, RiskAssessment, etc.

Diagnostics

Observation, Report, Specimen, ImagingStudy, Genomics, Specimen, ImagingStudy, etc.

Medications

Medication, Request, Dispense, Administration, Statement, Immunization, etc.

Workflow

Introduction + Task, Appointment, Schedule, Referral, PlanDefinition, etc

Financial

Claim, Account, Invoice, ChargeItem, Coverage + Eligibility Request & Response, ExplanationOfBenefit, etc.

Level 5 Providing the ability to reason about the healthcare process

Clinical Reasoning

Library, PlanDefinition & GuidanceResponse, Measure/MeasureReport, etc.

Dependencies between the modules are mainly downwards, with some horizontal dependencies. Implementers should choose the content modules to engage with based on their requirements, and should only engage with the reasoning module if they need to do clinical decision support, and/or Quality Measures.

In addition to the use case based assistance in the modules, these additional documentation pages may be useful:

• Common Use Cases: Personal Health Record, Document Sharing (XDS) and Decision Support

• Resource Guide: Further information about the resources and the relationship between them

Finally, one important place to look is the registry of implementation guides , to see whether similar (or identical) requirements have been met.

1.10 HL7, ANSI and the FHIR Standard

URL: https://hl7.org/fhir/R4/ansi.html

1.10.0 HL7, ANSI and the FHIR Standard

FHIR Management Group | Maturity Level: N/A | Standards Status: Informative

| HL7 is an ANSI Accredited Standards Development Organization. As such, ANSI reviews HL7 processes both in general, and also specifically with regard to each standard. ANSI has certified that portions of this release of FHIR (Release 4) met its requirements for development of a formal standard.

Given that many areas of the FHIR specification are still undergoing Trial Use by the HL7 Community, and hence are not ready for balloting as a formal ANSI standard, and in order to manage the processes around the ballot process, four different portions of this specification were balloted as ANSI Normative Specifications:

Infrastructure | The core framework on which FHIR solutions depend (Abstract base types, data types, formats, the RESTful API, and content and typing rules)
Conformance | The terminology infrastructure and the base resources that define FHIR implementations and that represent how the specification, and conformance to it, is defined
Patient | The Patient resource and related content
Observation | The Observation resource and related content

For the purposes of American National Standards, each of these is an independent standard, and the other parts of the specification do not contain requirements necessary for conformance to the formal standard.

Given that the Normative parts of the standard are still a subset of what implementers need to use, implementers are generally focusing on conforming to FHIR R4 as a whole rather than the formal standards. Future versions of this specification will extend the coverage of format standards.

1.10.1 FHIR Infrastructure Package

URL: https://hl7.org/fhir/R4/ansi-infrastructure.html

1.10.1 FHIR Infrastructure Package

FHIR Management Group | Maturity Level: N/A | Standards Status: Normative

Formal Name: | HL7 FHIR® R4 Infrastructure, Release 1
ANSI Designation: | ANSI/HL7 FHIR® R4 INFRASTRUCTURE R1-2019
Date of Approval: | 2019-03-22

This ANSI Normative Standard contains the Infrastructure parts of the FHIR specification - the core framework on which FHIR solutions depend (Abstract base types, data types, formats, the RESTful API, and content and typing rules).

This standard uses the ANSI FHIR Conformance standard (for CapabilityStatement).

Content in this package:

Pages BackboneElement ΔR ΔB + Defns: ΔR ΔB Conformance Rules ΔR ΔB Data Types ΔR ΔB + Defns: ΔR ΔB Defining Extensions ΔR ΔB Element ΔR ΔB + Defns: ΔR ΔB Element Definition ΔR ΔB + Defns: ΔR ΔB Extensibility ΔR ΔB + Defns: ΔR ΔB Formats ΔR ΔB RESTful API ΔR ΔB JSON Format ΔR ΔB MetaData Types ΔR ΔB + Defns: ΔR ΔB Narrative ΔR ΔB + Defns: ΔR ΔB Operations Framework (RESTful API) ΔR ΔB Profiling FHIR ΔR ΔB Resource References ΔR ΔB + Defns: ΔR ΔB Search (RESTful API) ΔR ΔB Using Codes and Terminologies ΔR ΔB Version Management Policy ΔR ΔB XML Format ΔR ΔB | Resources Binary ΔR ΔB + Defns: ΔR ΔB Bundle ΔR ΔB + Defns: ΔR ΔB DomainResource ΔR ΔB + Defns: ΔR ΔB OperationOutcome ΔR ΔB + Defns: ΔR ΔB Parameters ΔR ΔB + Defns: ΔR ΔB Resource ΔR ΔB + Defns: ΔR ΔB | Operation Resource validate ΔR ΔB | Valuesets BundleType ΔR ΔB HTTPVerb ΔR ΔB IssueSeverity ΔR ΔB IssueType ΔR ΔB MimeType ΔR ΔB SearchEntryMode ΔR ΔB | Codesystems BundleType ΔR ΔB HTTPVerb ΔR ΔB IssueSeverity ΔR ΔB IssueType ΔR ΔB SearchEntryMode ΔR ΔB

1.10.2 FHIR Conformance Package

URL: https://hl7.org/fhir/R4/ansi-conformance.html

1.10.2 FHIR Conformance Package

FHIR Management Group | Maturity Level: N/A | Standards Status: Normative

Formal Name: | HL7 FHIR R4 Terminology & Conformance, Release 1
ANSI Designation: | ANSI/HL7 FHIR R4 TERMINOLOGY R1-2019
Date of Approval: | 2019-08-09

This ANSI Normative Standard contains the Conformance parts of the FHIR specification - the terminology infrastructure and the base resources that define FHIR implementations and that represent how the specification, and conformance to it, is defined.

This standard uses the ANSI FHIR Infrastructure standard.

Content in this package:

1.10.3 FHIR Patient Package

URL: https://hl7.org/fhir/R4/ansi-patient.html

1.10.3 FHIR Patient Package

FHIR Management Group | Maturity Level: N/A | Standards Status: Normative

Formal Name: | HL7 FHIR R4 Patient, Release 1
ANSI Designation: | ANSI/HL7 FHIR® R4 PATIENT R1-2019
Date of Approval: | 2019-03-22

This ANSI Normative Standard contains the Patient part of the FHIR specification - the Patient resource and its value sets and code systems.

This standard uses the ANSI FHIR Infrastructure standard.

Content in this package:

Resource Patient ΔR ΔB + Defns: ΔR ΔB | Valuesets AdministrativeGender ΔR ΔB LinkType ΔR ΔB MaritalStatus ΔR ΔB Patient Contact Relationship ΔR ΔB | Codesystems AdministrativeGender ΔR ΔB LinkType ΔR ΔB

URL: https://hl7.org/fhir/R4/ansi-observation.html

1.10.4 FHIR Observation Package

FHIR Management Group | Maturity Level: N/A | Standards Status: Normative

This ANSI Normative Standard contains the Observation part of the FHIR specification - the Observation resource and its value sets and code systems.

Formal Name: | HL7 FHIR R4 Observation, Release 1
ANSI Designation: | ANSI/HL7 FHIR® OBS R1-2019
Date of Approval: | 2019-08-09

This standard uses the ANSI FHIR Infrastructure standard.

Content in this package:

Resource Observation ΔR ΔB + Defns: ΔR ΔB | Valuesets DataAbsentReason ΔR ΔB Observation Interpretation Codes ΔR ΔB ObservationStatus ΔR ΔB | Codesystems DataAbsentReason ΔR ΔB ObservationStatus ΔR ΔB
