20.1.1 Location.Read (Organizational Directory) (R4)

File: site/apis/20-Identification-Entities/1-R4/928-Location-Read-Organizational-Directory-R4.html
Epic API ID | 928
FHIR version | R4
Categories | Identification Entities
API type | USCDI
A la carte | Industry-Standard Level 1 API
USCDI | Yes
Available in inpatient and other contexts | Yes
ONC certification products | EpicCare Ambulatory Base, EpicCare Inpatient Base
ONC certification versions | August 2019
HTTP method | GET
URL template | api/FHIR/R4/Location/{ID}
Supports OAuth 2.0 | True
Supported user types | Backend Systems and Non-OAuth 2.0, Clinicians or Administrative Users, Patients
Performs scope validation | False
Source | https://fhir.epic.com/Specifications?api=928

Description

The FHIR Location resource defines details and position information for a physical place where resources and participants can be found. The Location resource is referenced by the Practitioner and Appointment resources and references the Organization resource to provide a more complete context in associating a patient or supply with a physical location.

Request parameters

Name | Type | Optional | Array | Cardinality | Description
ID | token | Required | | | The Location FHIR ID.

Response elements

Name | Type | Optional | Array | Cardinality | Description
Location (R4) | Resource | | | | An instance of the R4 Location FHIR resource.
Location (R4).address | Address | | | 0..1 | The physical location.
Location (R4).alias | string | | Yes | 0..* | A list of alternative names that the location is known as or was known as in the past.
Location (R4).description | string | | | 0..1 | Additional details about the location that can be shown to further identify the location.
Location (R4).endpoint | Reference | | Yes | 0..1 | If the location is a provider or resource, this is an endpoint reference containing an address.
Location (R4).extension (specialty) (also: extension (specialty)) | Extension | | Yes | 0..1 | The specialty of the location. URL: https://open.epic.com/fhir/extensions/specialty
Location (R4).hoursOfOperation | BackboneElement | | Yes | 0..* | The hours of operation for the location.
Location (R4).id | id | | | 1..1 | The Location FHIR ID.
Location (R4).identifier | Identifier | | Yes | 1..* | Unique code or number identifying the location to its users Starting in November 2024, for locations with a National Provider Identifier (NPI), this service returns an identifier type of NPI and the ID of the NPI. In the response, NPI returns a system

URL of http://hl7.org/fhir/sid/us-npi.

Location (R4).managingOrganization | Reference | | | 0..1 | Organization responsible for provisioning and upkeep, typically the parent hospital/clinic area for this location.

Location (R4).mode | code | | | 0..1 | Indicates whether a resource instance represents a specific location or a class of locations. Epic only supports a value of instance in this element. Instance is a specific, findable location.

Location (R4).name | string | | | 0..1 | The name of the location as used by humans.

Location (R4).partOf | Reference | | | 0..1 | Another location that this location is part of

Location (R4).status | code | | | 0..1 | Indicates whether the location is still in use.

Location (R4).telecom | ContactPoint | | Yes | 0..* | The contact details for the location.

Location (R4).type | CodeableConcept | | Yes | 0..1 | Type of function performed by this location.

Sample request

```
GET https://hostname/instance/api/FHIR/R4/Location/e-iz4EXUrNFfCKJwdsZPd9Q3
```

Sample response

```

20.1.2 Location.Search (Organizational Directory) (R4)

File: site/apis/20-Identification-Entities/1-R4/10084-Location-Search-Organizational-Directory-R4.html
Epic API ID | 10084
FHIR version | R4
Categories | Identification Entities
API type | USCDI
A la carte | Industry-Standard Level 1 API
USCDI | Yes
Available in inpatient and other contexts | Yes
ONC certification products | EpicCare Ambulatory Base, EpicCare Inpatient Base
ONC certification versions | May 2021
HTTP method | GET
URL template | /api/FHIR/R4/Location?_id={_id}
Supports OAuth 2.0 | True
Supported user types | Backend Systems and Non-OAuth 2.0, Clinicians or Administrative Users, Patients
Performs scope validation | False
Source | https://fhir.epic.com/Specifications?api=10084

Description

The FHIR Location resource defines details and position information for a physical place where resources and participants can be found. The Location resource is referenced by the Practitioner and Appointment resources and references the Organization resource in an effort to provide a more complete context in associating a patient or supply with a physical location.

Request parameters

Name | Type | Optional | Array | Cardinality | Description
_count | number | Optional | Yes | | Number of results per page.
_id | token | Optional | Yes | | FHIR resource IDs for the desired resources. Can be used in combination with _count, _include, and _revInclude. All others will be ignored.
_include | string | Optional | Yes | | Used to indicate which referenced resources to include in the search bundle.
_revinclude | string | Optional | Yes | | Used to include Provenance or AuditEvent resources that refer to search results, when available.
address | string | Optional | Yes | | The physical location.
status | token | Optional | Yes | | Indicates whether the location is still in use. When this parameter is omitted, the system only returns active locations.

Request parameters (post-filtered search parameters)

Name | Type | Optional | Array | Cardinality | Description
address-city | string | Optional | Yes | | The city where the location is physically located.
address-country | string | Optional | Yes | | The country where the location is physically located.
address-postalcode | string | Optional | Yes | | The postal code where the location is physically located.
address-state | string | Optional | Yes | | The state where the location is physically located.
identifier | token | Optional | Yes | | Unique code or number identifying the location to its users Starting in November 2024, for locations with a National Provider Identifier (NPI), this service returns an identifier type of NPI and the ID of the NPI. In the response, NPI returns a system URL of http://hl7.org/fhir/sid/us-npi.
name | string | Optional | Yes | | The name of the location as used by humans.
partof | reference | Optional | Yes | | Another location that this location is part of

Response elements

Name | Type | Optional | Array | Cardinality | Description
Location (R4) | Resource | | | | An instance of the R4 Location FHIR resource.
Location (R4).address | Address | | | 0..1 | The physical location.
Location (R4).alias | string | | Yes | 0..* | A list of alternative names that the location is known as or was known as in the past.
Location (R4).description | string | | | 0..1 | Additional details about the location that can be shown to further identify the location.
Location (R4).endpoint | Reference | | Yes | 0..1 | If the location is a provider or resource, this is an endpoint reference containing an address.
Location (R4).extension (specialty) (also: extension (specialty)) | Extension | | Yes | 0..1 | The specialty of the location. URL: https://open.epic.com/fhir/extensions/specialty
Location (R4).hoursOfOperation | BackboneElement | | Yes | 0..* | The hours of operation for the location.
Location (R4).id | id | | | 1..1 | The Location FHIR ID.
Location (R4).identifier | Identifier | | Yes | 1..* | Unique code or number identifying the location to its users Starting in November 2024, for locations with a National Provider Identifier (NPI), this service returns an identifier type of NPI and the ID of the NPI. In the response, NPI returns a system URL of http://hl7.org/fhir/sid/us-npi.
Location (R4).managingOrganization | Reference | | | 0..1 | Organization responsible for provisioning and upkeep, typically the parent hospital/clinic area for this location.
Location (R4).mode | code | | | 0..1 | Indicates whether a resource instance represents a specific location or a class of locations. Epic only supports a value of instance in this element. Instance is a specific, findable location.
Location (R4).name | string | | | 0..1 | The name of the location as used by humans.
Location (R4).partOf | Reference | | | 0..1 | Another location that this location is part of
Location (R4).status | code | | | 0..1 | Indicates whether the location is still in use.
Location (R4).telecom | ContactPoint | | Yes | 0..* | The contact details for the location.
Location (R4).type | CodeableConcept | | Yes | 0..1 | Type of function performed by this location.

Description

The FHIR Location resource defines details and position information for a physical place where resources and participants can be found. The Location resource is referenced by the Practitioner and Appointment resources and references the Organization resource to provide a more complete context in associating a patient or supply with a physical location.

Request parameters

Name | Type | Optional | Array | Cardinality | Description
ID | token | Required | | | The Location FHIR ID.

Response elements

Name | Type | Optional | Array | Cardinality | Description
Location (STU3) | Location | | | | An instance of the STU3 Location resource.
Location (STU3).address | Address | | | 0..1 | The physical location.
Location (STU3).alias | string | | Yes | 0..* | A list of alternative names that the location is known as or was known as in the past.
Location (STU3).description | string | | | 0..1 | Additional details about the location that can be shown to further identify the location.
Location (STU3).endpoint | Reference | | Yes | 0..1 | If the location is a provider or resource, this is an endpoint reference containing an address.
Location (STU3).extension (specialty) (also: extension (specialty)) | Extension | | Yes | 0..1 | The specialty of the location. URL: https://open.epic.com/fhir/extensions/specialty
Location (STU3).id | id | | | 1..1 | The Location FHIR ID.
Location (STU3).identifier | Identifier | | Yes | 1..* | Unique code or number identifying the location to its users Starting in November 2024, for locations with a National Provider Identifier (NPI), this service returns an identifier type of NPI and the ID of the NPI. In the response, NPI returns a system URL of http://hl7.org/fhir/sid/us-npi.
Location (STU3).managingOrganization | Reference | | | 0..1 | Organization responsible for provisioning and upkeep, typically the parent hospital/clinic area for this location.
Location (STU3).mode | code | | | 0..1 | Indicates whether a resource instance represents a specific location or a class of locations. Epic only supports a value of instance in this element. Instance is a specific, findable location.
Location (STU3).name | string | | | 0..1 | The name of the location as used by humans.
Location (STU3).partOf | Reference | | | 0..1 | Another location that this location is part of.
Location (STU3).status | code | | | 0..1 | Indicates whether the location is still in use.
Location (STU3).telecom | ContactPoint | | Yes | 0..* | The contact details for the location.
Location (STU3).type | CodeableConcept | | | 0..1 | Type of function performed by this location.
